EDUCATION

Bachelor of Technology in AI & Data Science

Shah & Anchor Kutchhi Engineering College (SAKEC)
Core Focus: AI Modules, Modular Digital Tools, Systems Architecture. 2025 – 2029 (Expected)

PROJECTS

AI Legal Aid (ai-law-aid)

- Architected a highly responsive web interface utilizing custom React states and modular CSS.
- Integrated advanced voice-to-text and text-to-voice for natural conversational accessibility.
- Engineered structured legal-assistance schemas to simplify complex legal terminologies.

Cinematiq AI Shot List

- Created a structured editor for compiling visual prompts, lens selections, and camera angles.
- Developed an automated planning environment for AI-assisted scene orchestration.

Spice Site (Interactive Web App)

- Implemented modular interactive elements and fluid layout animations using React and Tailwind CSS.
- Designed responsive media grids and asset loading schemas optimized for speed.

Indoor Lighting Simulation

- Custom lighting study module analyzing form, perspective, and illumination bounds inside closed virtual environments.

SKILLS

Programming

- Python (Automation/Dev), Java (OOP), C / C++

Web Development

- React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JavaScript (ES6+), HTML5/CSS3

AI & Machine Learning

- Pandas, NumPy, Seaborn (Visualization), Scikit-learn (Statistical Modeling), Jupyter

Interactive Design

- AutoCAD, Blender (3D Modeling), Canva, DaVinci Resolve

Platforms/Tools

- VS Code, Antigravity, Git/GitHub, CUDA 12.1

FOCUS

Quantum Computing

Deep focus on Shor's algorithm and entanglement-based cryptography.

Java Systems

Developed Smart Canteen transaction logic for modular stock management.
